

Supplementary Table S3: Genes that were differentially expressed during the study and their annotation. Genes expressed with a \log_2 fold change of <-1.4 or >1.4 and $p < 0.05$ were considered differentially expressed. We used Cyanobase (<http://genome.kazusa.or.jp/cyanobase>) as a guideline to distinguish between genes of different functional categories. We have also designated several genes that are listed as unknown or hypothetical in CyanoBase, but are annotated in the Kyoto Encyclopedia of Genes and Genomes (KEGG) (<https://www.kegg.jp/>) or in recent literature. In the latter case, references are added. References not included in the main text are listed as footnotes.

ORF ID	Gene name	Time after light switch										Functional category and gene function (Cyanobase, KEGG, recent literature)	Reference (if not annotated in Cyanobase or KEGG)			
		blue light					orange light			red light						
		1h	4h	24h	48h	192h	4h	192h	4h	192h	192h
