Figure S3 Heatmaps visualizing the daily patterns in body temperature. Each heatmap displays the temperature patterns for one of the three experimental groups throughout the entire experiment. Each line corresponds to one day (24h) and each rectangular depicts the average value of all animals in the group for one hour. The period during which food was restricted for both the dark-fed and light-fed animals is framed by the dashed black rectangular. $n=6$, $n=7$ and $n=7$ for the AL, dark-fed and light-fed animals, respectively.
