

Supporting Information S1 — Dataset summary statistics

Table S1.1: Summary statistics of the tracking data used in the analyses in the main text. Values reported are medians. N_{Area} denotes the effective sample size. In the diet column, H/F refers to Herbivorous/Frugivorous species while C/O to Carnivorous/Omnivorous species.

Species	n (individuals)	Frequency (min)	Year	Duration (Days)	n (locations)	n_{Area}	Mass (kg)	Diet	Data Source
<i>Acimonyx jubatus</i>	2	0.02	2012	19.1	104612	39.9	14.2	C/O	MovebankID: 11212867
<i>Aepycoerus melampus</i>	21	20	2011	295.5	19623	147.3	52.5	H/F	(Noonan & et al., 2018)
