

Appendix 2. Network Meta-Analysis of Additional Outcome Variables

Fig 1. Forest Plot of Response Rates: Lurasidone Versus Comparators

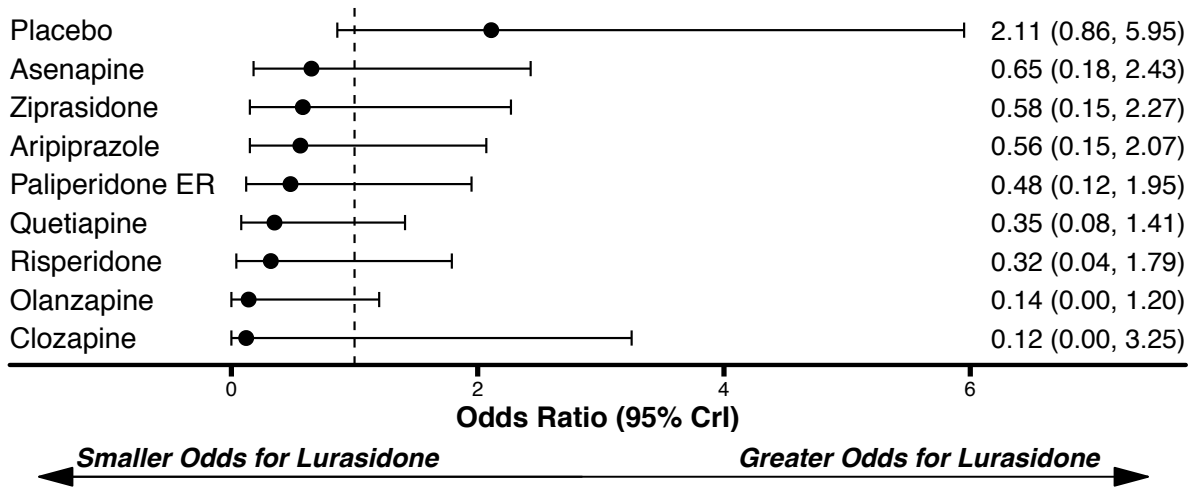

* Statistically significant compared to lurasidone

Dashed line at 1 represents no difference from lurasidone.

Response was defined as a $\geq 20\%$ improvement in PANSS total score with 3 exceptions: Mozes 2006 and Findling 2012 reported it as $\geq 30\%$ improvement in PANSS total score and Jensen 2008 reported it as $\geq 40\%$ improvement in PANSS total score.

Fig 2. Forest Plot of Somnolence: Lurasidone vs. Comparators

* Statistically significant compared to lurasidone

Dashed line at 1 represents no difference from lurasidone.

Fig 3. Forest Plot of Sedation: Lurasidone versus Comparators

* Statistically significant compared to lurasidone

Dashed line at 1 represents no difference from lurasidone.

Fig 4. Forest Plot of Change from Baseline in Serum Glucose: Lurasidone vs. Comparators

* Statistically significant compared to lurasidone

Dashed line at 0 represents no difference from lurasidone.

Fig 5. Forest Plot of Change from Baseline in Total Cholesterol: Lurasidone vs. Comparators

* Statistically significant compared to lurasidone

Dashed line at 0 represents no difference from lurasidone.

Fig 6. Forest Plot of Change from Baseline in Serum Triglycerides: Lurasidone vs. Comparators

* Statistically significant compared to lurasidone

Dashed line at 0 represents no difference from lurasidone.

Fig 7. Forest Plot of Discontinuation Due to Adverse Events: Lurasidone vs. Comparators

* Statistically significant compared to lurasidone

Dashed line at 1 represents no difference from lurasidone.
