

S1 Table

Study Flow. The number of interviews completed each year, loss to follow up and the number of study nets evaluated for each durability component is shown.

	2014 (Year 1)	2015 (Year 2)	2016 (Year 3)
Households interviewed	87.2% (2,962/3,398)	95.7% (2,834/2,962)	96.3% (2,730/2,834)
Household loss to follow up	12.8% (436/3,398)	4.3% (128/2,962)	3.7% (104/2,834)
Study nets loss to follow up	8.3% (880/10,598)	7.2% (539/7,477)	10.4% (551/5,311)
Nets lost from households	23.1% (2,241/9,726)	23.5% (1,627/6,938)	39.0% (1,855/4,760)
Nets inspected for holes	82.5% (6,166/7,477)	90.1% (4,783/5,311)	86.7% (2,519/2,905)
Nets evaluated by Ifakara Ambient Chamber Test	142	144	140
Nets evaluated for bio efficacy	142	144	140
Nets evaluated for chemical content	144	144	144
