Description of Additional Supplementary Files

File Name: Supplementary Software
Description: The program was written in Matlab R2015b. The installation, run times and instructions for use are given in the document: Reinig_user_manual.pdf. The user can choose a plot option from 1 to 7 and a model from 1-14. The outputs correspond to the figures in the paper as outlined in the user manual. The code is available at https://github.com/Ringrose546/Beyond_memory_V2
