## Supplementary Materials

ABSI, A body shape index; BAI, body adiposity index; HC, hip circumference; TC, thigh circumference; WC, waist circumference; WHR, waist-to-hip ratio; WHtR, waist-to-height ratio; WTR, waist-ti-thigh ratio

Supplementary Materials

**Table S3.** Reported risk estimates of all-cause mortality across categories of central obesity measures in primary studies.

Exposure categories	Effect size (95% CI)	Confounders
Adegbija, Australia's Northern Territory screening programme		
Waist circumference (cm)		
73.0 (median)	1.00	Age, tobacco smoking status, alcohol consumption, and BMI
89.5	1.26 (0.85-1.87)	
115.5	2.03 (1.22-3.39)	
Andersen, the Shanghai Men's Health Study		
Waist-to-hip ratio		
<0.86	1.00	Age, birth year, education, occupation, regular exercise, dietary intake of saturated fats, fruits and vegetables, alcohol consumption, height, smoking status, and BMI
0.86-0.89	1.10 (0.95-1.27)	
0.90-0.91	1.21 (1.04-1.41)	
0.92-0.94	1.11 (0.96-1.30)	
>0.95	1.42 (1.22-1.65)	
1-SD increase, Never smokers	1.12 (1.02-1.22)	
1-SD increase, Former smokers	1.15 (1.03-1.28)	
1-SD increase, Current smokers	1.11 (1.04-1.19)	
Andersen, the Shanghai Women's Health Study		
Waist-to-hip ratio		
<0.78	1.00	Age, birth year, education, occupation, regular exercise, dietary intake of saturated fats, fruits and vegetables, alcohol consumption, height, menopausal status, smoking status, and BMI
0.78-0.79	1.10 (0.96-1.27)	
0.80-0.82	1.11 (0.97-1.27)	
0.83-0.85	1.20 (1.05-1.37)	
>0.86	1.48 (1.30-1.69)	
1-SD increase, Never smokers	1.15 (1.11-1.19)	
Baik, The Health Professionals Follow-up Study		
Waist circumference (cm)		
<87.6	1.00	Age, smoking status, family history of myocardial infarction or colon cancer before age 60 years, profession, marital status, height, alcohol intake, and quintiles of calorie-adjusted intakes of vitamin A, vitamin E, and dietary fiber
87.6-92.0	0.98 (0.80-1.21)	
92.0-96.3	0.89 (0.72-1.12)	
96.5-102.1	1.07 (0.88-1.31)	
>102.4	1.37 (1.12-1.67)	
Baik, The Health Professionals Follow-up Study		
Hip circumference (cm)		

Supplementary Materials

<96.0	1.00	Age, smoking status, family history of myocardial infarction or colon cancer before age 60 years, profession, marital status, height, alcohol intake, and quintiles of calorie-adjusted intakes of vitamin A, vitamin E, and dietary fiber
96.0-98.8	1.00 (0.82-1.21)	
99.0-101.6	0.96 (0.82-1.12)	
101.8-106.4	0.76 (0.63-0.91)	
>106.7	1.24 (1.06-1.44)	
Baik, The Health Professionals Follow-up Study Waist-to-hip ratio		
<0.90	1.00	Age, smoking status, family history of myocardial infarction or colon cancer before age 60 years, profession, marital status, height, alcohol intake, and quintiles of calorie-adjusted intakes of vitamin A, vitamin E, and dietary fiber
0.90-0.91	0.67 (0.52-0.87)	
0.90-0.94	0.88 (0.72-1.08)	
0.95-0.97	1.05 (0.87-1.27)	
≥0.98	1.15 (0.96-1.38)	
Bellocco, the Swedish National March Cohort Waist circumference (cm), Men		
<94	1.00	Age at enrollment, physical activity, cigarette smoking status, alcohol drinking, use of vitamins and minerals, and educational level
94-102	0.97 (0.80-1.16)	
>102	1.30 (1.07-1.58)	
Bellocco, the Swedish National March Cohort Waist circumference (cm), Women		
<80	1.00	Age at enrollment, physical activity, cigarette smoking status, alcohol drinking, use of vitamins and minerals, educational level in men, contraceptive pill use and hormone therapy replacement in women
80-88	1.32 (1.07-1.63)	
>88	1.35 (1.08-1.67)	
Beleigoli, The Bambui Cohort Study of Ageing Waist circumference (cm)		
WC, 1 cm	1.00 (0.99-1.01)	Age, sex, smoking, Chagas disease, log-transformed creatinine, log-transformed BNP levels, major ECG abnormalities, physical activity within the last 90 days, household income, and education
WC, 1 cm, Non-smokers	1.00 (0.99-1.01)	
WC, 1 cm, excluding deaths during first 5 years	0.99 (0.98-1.01)	
Bigaard, Danish prospective study 'Diet, Cancer and Health Hip circumference (cm)		
HC, Men, 10% increase (~10 cm)	0.65 (0.58-0.74)	Age, smoking status, waist circumference, and BMI
HC, Women, 10% increase (~10 cm)	0.75 (0.62-0.86)	
Bombelli, the PAMELA study Waist circumference		

Supplementary Materials

WC, 1 cm	1.01 (1.00-1.02)	Age, gender, previous cardiovascular events, 24 h systolic blood pressure, total serum cholesterol, plasma glucose, cigarette smoking and antihypertensive drug treatment
Boggs, the Black Women's Health Study Waist circumference (cm), education <12 years		
66.0-76.0	1.00	Age, questionnaire cycle, level of education, marital status, vigorous physical activity, alcohol intake, and BMI
76.2-86.0	0.96 (0.55-1.67)	
86.3-96.3	1.10 (0.61-1.99)	
96.5-119.4	1.03 (0.53-2.01)	
Boggs, the Black Women's Health Study Waist circumference (cm), education >12 years		
66.0-76.0	1.00	Age, questionnaire cycle, level of education, marital status, vigorous physical activity, alcohol intake, and BMI
76.2-86.0	1.12 (0.84-1.48)	
86.3-96.3	1.34 (0.97-1.85)	
96.5-119.4	1.33 (0.91-1.94)	
Boggs, the Black Women's Health Study Waist circumference (cm), Never smokers		
55.9-65.8	1.28 (0.84-1.94)	Age, follow-up cycle, education, marital status, vigorous physical activity, alcohol intake, pack-years of smoking (former and current smokers only), and BMI
66.0-70.9	1.00	
71.0-75.9	1.05 (0.74-1.51)	
76.0-81.0	1.12 (0.77-1.62)	
81.2-86.1	1.15 (0.79-1.67)	
86.3-91.2	1.29 (0.88-1.90)	
91.4-96.2	1.41 (0.94-2.13)	
96.5-101.3	1.15 (0.73-1.79)	
101.6-119.4	1.40 (0.90-2.19)	
Bowman, UK Biobank Study Waist-to-hip ratio, normal weight only		
0.825 (median)	1.00	Age, sex, smoking history (never or former smoker), alcohol intake, and educational attainment
0.875	1.28 (1.09-1.49)	
0.925	1.33 (1.08-1.65)	
Calori, the Cremona study Waist circumference (cm)		
WC, 1 cm	1.01 (0.99-1.02)	Age and sex
Cameron, the AusDiab study		

Supplementary Materials

Waist circumference (cm), Men		
<88.2	0.78 (0.46-1.32)	Age, self-reported history of cardiovascular disease (angina, myocardial infarction or stroke),self-reported cancer (excluding skin cancer) and smoking status
88.2-94.2	1.00	
94.3-99.3	0.69 (0.43-1.09)	
99.4-106.2	0.66 (0.42-1.02)	
>106.2	0.80 (0.52-1.24)	
Cameron, the AusDiab study Waist circumference (cm), Women		
<73.7	1.52 (0.82-2.85)	Age, self-reported history of cardiovascular disease (angina, myocardial infarction or stroke),self-reported cancer (excluding skin cancer) and smoking status
73.7-80.3	1.00	
80.4-87.0	1.43 (0.82-2.48)	
87.1-96.2	0.98 (0.60-1.76)	
>96.2	1.51 (0.88-2.56)
