

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: **Macrophage Secretion of miR-106b-5p Causes Renin-Dependent Hypertension.** Unbiased miRNA expression analyses using media from KODMAC or control peritoneal macrophages (n=9/group) by Affymetrix GeneChip miRNA 4.0 microarrays by Washington University's Genome Technology Access Center. Post-processing of array signal data was performed with Partek Genomics Suite 6.6 (Partek, St Louis, MO).
