

b

	Mint3 expression		P value
	Positive	Negative	
HIF-1α expression			
Positive	21	2	P = 0.0073
Negative	8	8	

Supplementary Figure 13. Immunostaining of Mint3 and HIF-1 α in pancreatic cancer specimens.

(a) Representative immunostaining of the indicated proteins in pancreatic cancer and normal pancreas. (b) Correlation between Mint3 and HIF-1 α staining in pancreatic cancer was analyzed using pancreatic cancer tissue microarrays. Correlation of Mint3 and HIF-1 α protein expression was statistically analyzed using the Chi-squared test.
