

## Supplementary Information Guide

**Supplementary Figure 1: Uncropped western blots.** Format: eighteen image display items.

**Table S1: Histone post translational modification mass spectrometry data in resting and stimulated BMDM.** See methods for details. Format: spreadsheet and graph.

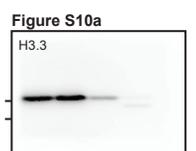

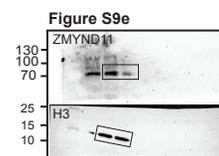

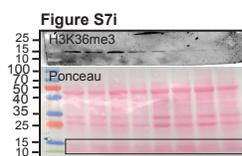

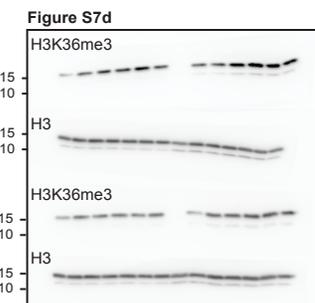

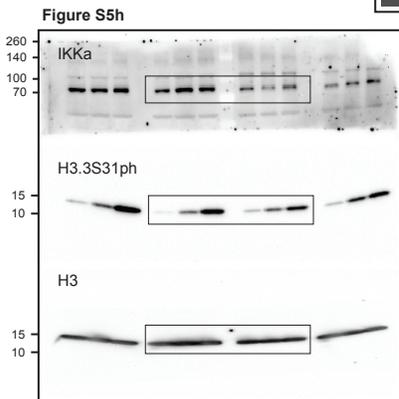

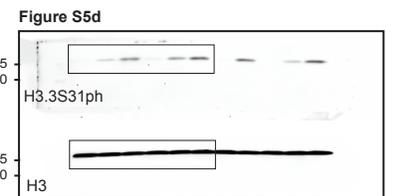

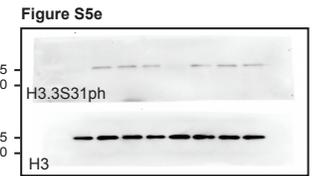

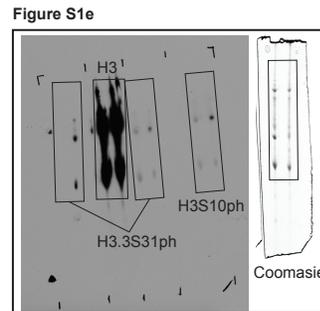

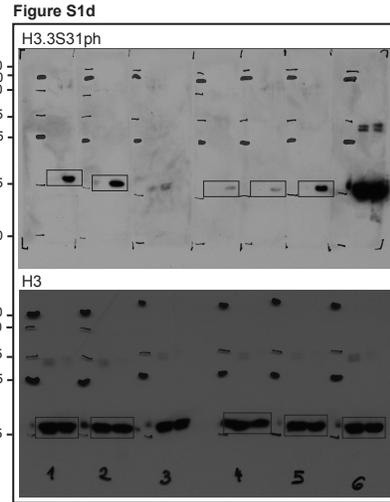

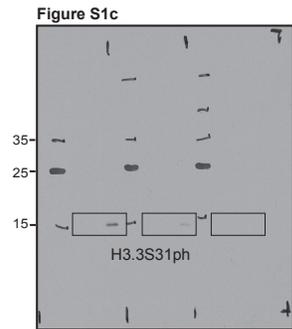

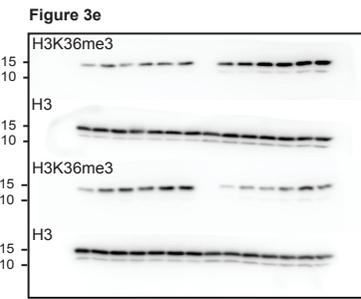

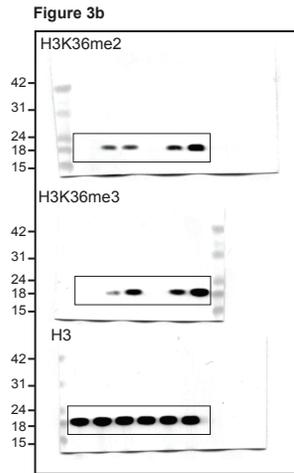

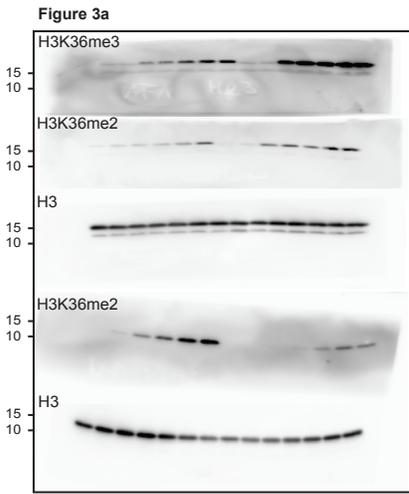

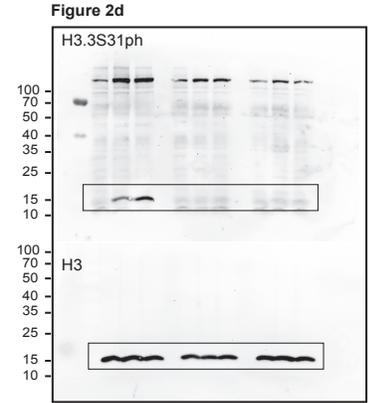

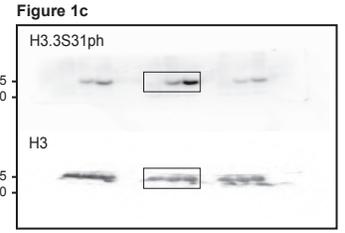

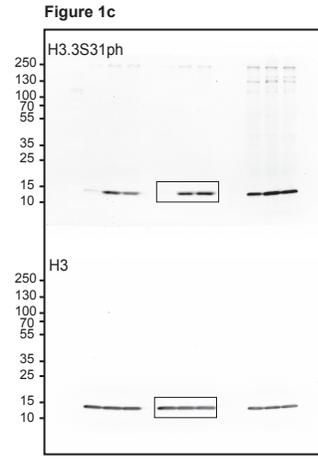

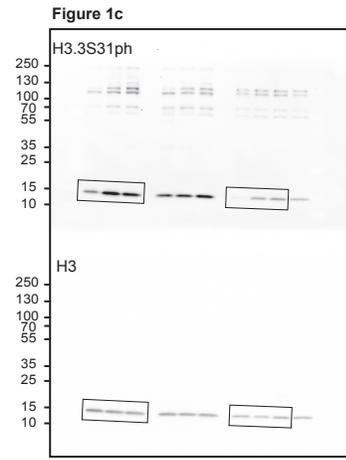

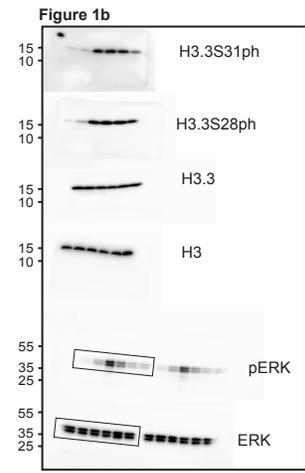

**Table S2: List of top ranked H3.3S31ph peaks, BMDM, 60 min LPS.** Genes were ranked by H3.3S31ph ChIPseq tag density from transcription start site to transcription end site. Format: gene list in rank order.

**Table S3: SETD2:H3.3S31ph structure characteristics.** Data collection and refinement statistics. Format: text table.

**Table S4: Intersection of H3.3S31ph top 1% genes and H3.3S31ph peak-annotated genes.** Format: gene list in alphabetical order.

# Supplementary information Figure 1

## Uncropped scans of Western blots

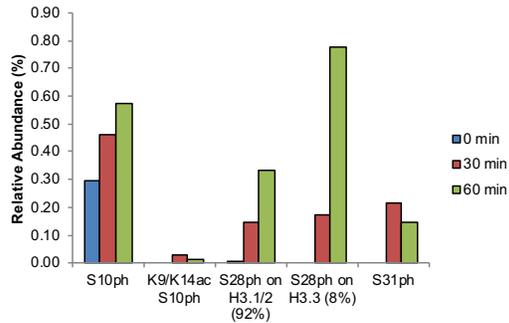

Supplemental Table 1
