

Appendix Table 2. Institutional and Prior Survey Results

	Residents (n=82)	Roman et al. ¹³	
		Residents n=139	Hospitalists n=197
Year of training			
PGY1	26 (31.7)	--	--
PGY2	25 (30.5)	--	--
PGY3 +	31 (36.5)	--	--
Hospitalized patients should have daily laboratory testing; n (% agree)	17 (20.7)	63 (45.3)	55 (27.9)
Hospitalized patients should have laboratory testing on discharge day; n (% agree)	17 (20.7)	52 (37.4)	62 (31.5)
I would be comfortable if my hospitalized patients received less daily laboratory testing; n (% agree)	60 (73.1)	119 (85.6)	166 (84.3)

Appendix Table 2. Comparison of our institutional survey results with a prior survey administered by Roman et al. The Roman et al. survey questions were utilized as a foundation for the institutional survey created. Survey results demonstrate our institutional culture is similar to prior trends, with the majority of residents favoring reduced daily labs.
