**Note:**

1. “Absolute inequality” is the Absolute inequality in reproductive service utilizations between adult mothers aged 20-34 years old and adolescents 15-19 years old.
2. The country’s income class is from the World Bank for the year that the data was collected.
3. “SSA” represents “Sub-Saharan African countries”. The list of sub-Saharan African countries could be found from here: <https://www.loc.gov/tr/amed/guide/afr-countrylist.html>.
4. “Countdown countries” are the 75 countries where more than 95% of all maternal and child deaths occur, including the 49 lowest-income countries. All Countdown profiles are available at [[www.countdown2015mnch.org/country-profiles](http://www.countdown2015mnch.org/country-profiles)]. We involved all Countdown countries with available data from DHS/MICS surveys conducted since 2010.

**Note:**

1. We mark the countries with absolute inequality (difference) between mothers 20-34 and 15-19 years old larger than 5 percentage points in orange.
2. Income classification: "L" represents "low-income country"; "LM" represents "lower-middle-income country"; "UM" represents "upper-middle-income country".
3. SSA: "1" represents "Sub-Saharan African country"; "0" represents "Not a Sub-Saharan African country".

**Note:**

1. We mark the countries with absolute inequality (difference) between mothers 20-34 and 15-19 years old larger than 5 percentage points in orange.
2. Income classification: "L" represents "low-income country"; "LM" represents "lower-middle-income country"; "UM" represents "upper-middle-income country".
3. SSA: "1" represents "Sub-Saharan African country"; "0" represents "Not a Sub-Saharan African country".

**Note:**

1. We mark the countries with absolute inequality (difference) between mothers 20-34 and 15-19 years old larger than 5 percentage points in orange.
2. Income classification: “L” represents “low-income country”; “LM” represents “lower-middle-income country”; “UM” represents “upper-middle-income country”.
3. SSA: “1” represents “Sub-Saharan African country”; “0” represents “Not a Sub-Saharan African country”.

**Note:**

1. We mark the countries with absolute inequality (difference) between mothers 20-34 and 15-19 years old larger than 5 percentage points in orange.
2. Income classification: "L" represents "low-income country"; "LM" represents "lower-middle-income country"; "UM" represents "upper-middle-income country".
3. SSA: "1" represents "Sub-Saharan African country"; "0" represents "Not a Sub-Saharan African country".

**Note:**

1. We keep countries with the latest survey conducted in 2010 or later. The time elapsed between two surveys must be five years or more.
2. "Change in absolute inequality" is "Absolute inequality, latest year" minus "Absolute inequality, earliest year".

**Appendix Table 12. Changes in absolute inequality between adult and adolescents mothers of delivering in a health facility at country-level, the latest year Vs. the earliest year<sup>1</sup> (continued)**

Country	Absolute inequality, latest year (percentage points)	Absolute inequality, earliest year (percentage points)	Change in absolute inequality <sup>2</sup>		Absolute annual change (percentage points)
			Value (percentage points)	P value	
Democratic Republic of the Congo	0.2	-0.4	0.6	0.855	0.10
