

**Small RNAs OmrA and OmrB promote class III flagellar gene expression by
inhibiting the synthesis of anti-Sigma factor FlgM**

Cédric Romilly, Mirthe Hoekzema^(a), Erik Holmqvist*, and E. Gerhart. H. Wagner*

Supplemental material

Figure S1. OmrA and B base-pair with the *flgM* mRNA near the ribosome binding site.

Figure S2. Absolute GFP/OD600 values of the experiments presented in the main paper.

Figure S3. Duplex prediction between the *flhD*, *flgM* or *flgM_M1* mRNAs with OmrA, OmrA_M1, or OmrA_M2

Table S1. Primers used in this study

Table S2. Strains used in this study

Table S3. Plasmids used in this study

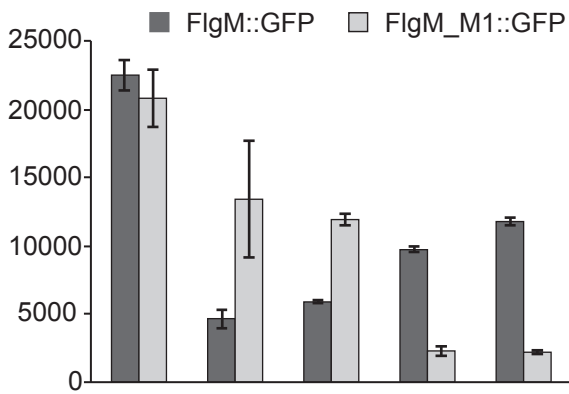

Figure S1. OmrA and B base-pair to *flgM* mRNA near the ribosome binding site.

A. Prediction of duplex formation between the *flgM* mRNA and OmrA or OmrB. The AUG start codon indicated is in green. G residues that show changes in cleavage intensity in the experiment displayed in B are highlighted in red; red dots - enhanced T1 cuts, red arrows - protection from T1 cleavage.

B. Footprinting experiment defining the OmrA/OmrB binding site on labeled *flgM* mRNA, in the absence or presence of Hfq. Protection against RNase T1 cleavage: red arrows; enhanced T1 cuts: red circles. Nucleotide positions, relative to the AUG start codon, are indicated next to the autoradiogram and are based on the T1 ladder (T1) and hydroxyl radical ladder (OH).

Holmqvist, E., Reimegård, J., Sterk, M., Grantcharova, N., Römling, U., and Wagner, E.G.H. (2010). Two antisense RNAs target the transcriptional regulator CsgD to inhibit curli synthesis. *EMBO J.* 29, 1840–1850.

Romilly, C., Deindl, S., and Wagner, E.G.H. (2019). The ribosomal protein S1-dependent standby site in *tisB* mRNA consists of a single-stranded region and a 5' structure element. *Proc. Natl. Acad. Sci. USA*, 116, 15901-15906.

Table S3. Plasmids used in this study

Plasmid name	Stock name	Reference	Remarks
pflgM::GFP	pEH159	This study	Translational fusion
pflgM_M1::GFP	pEH173	This study	Translational fusion
pControl	pJV300	(Sittka et al., 2007)	Empty control plasmid
pOmrA	pEH67	(Holmqvist et al., 2010)	Constitutive expression of OmrA
pOmrB	pEH68	(Holmqvist et al., 2010)	Constitutive expression of OmrB
pOmrA_M1	pEH171	This study	Constitutive expression of OmrA_M1
pOmrB_M1	pEH172	This study	Constitutive expression of OmrB_M1
pOmrA_M2	pEH80	This study	Constitutive expression of OmrA_M2
pOmrB_M2	pEH83	This study	Constitutive expression of OmrB_M2
pflhD::GFP	pEH260	This study	Translational fusion
pfliC	pSC21-fliC	(Kalir et al., 2001)	Transcriptional fusion
pFliE	pSC21-fliE	(Kalir et al., 2001)	Transcriptional fusion
pflgM 3xFLAG	pMH26	This study	Template for PCR

Holmqvist, E., Reimegård, J., Sterk, M., Grantcharova, N., Römling, U., and Wagner, E.G.H. (2010). Two antisense RNAs target the transcriptional regulator CsgD to inhibit curli synthesis. *EMBO J.* 29, 1840–1850.
