

Figure S1. Confirmation of the transfections. (A) The transfections of the miR-216a-5p mimic and anti-miR-216a-5p were confirmed by RT-PCR. \* $P < 0.05$ , \*\* $P < 0.01$ . (B) The transfection with KIAA0101 alone (+KIAA0101) increased the protein expression of KIAA0101 in EC9706 and TE1 cells, while transfection with the KIAA0101-targeted shRNA (-sh) decreased the expression of KIAA0101.
