

Supplementary Figure S1. Negative-stain electron micrographs of GII.2 virus-like particles.

Supplementary Figure S2. GII.2 1976 SMV and GII.2 Chapel Hill Recognition of HBGA. GII.2 SMV 1976 (**A**) and GII.2 Chapel Hill (**B**) VLPs were titrated against archived saliva samples of known HBGA expression profile. One-site specific binding curves were fitted with error bars representing the standard error of the mean.

Supplementary Figure S3. Bile Enhances Binding of GII.2 VLP to HBGA.
