

1

2 **Supplementary Figure S1.** The DPPH radical scavenging activity of WHC. WHC dose-responsively
3 induces the DPPH, suggesting that WHC exhibits a potential antioxidant property. Significance for
4 multiple comparison was determined by the analysis of variance (ANOVA) coupled with Tukey's
5 HSD Post-Hoc Tests using JMP®12 software. Results marked without overlapping letters show
6 significant differences ($P < 0.05$).
