Supplementary Figure 1: FK506 at 10^{-10} M concentration is unable to activate ALK2^{WT} for the activin A-induced BMP signaling.

Supplementary Figure 2: Overexpression of ALK1, ALK3 and ALK6 in Figure 4 was confirmed by RT-PCR.

Supplementary Figure 3: Overexpression of kinase-deficient ActR-IIA^{K219R}, ActR-IIB^{K217R} and BMPR-2^{K230R} significantly down-regulated activin-A-induced BMP signaling via ALK2^{WT} upon FKBP12 dissociation in C2C12BRA cells as well.
