Supplemental Figure VI

## **Supplemental Figure legend**

**Supplemental Figure I. Macroscopic, ecocolor Doppler and computed tomography vision of MFS and non-MFS TAA.** In the left side, intraoperative view of ascending aortic aneurysm associated to non-MFS and MFS aorta; in the middle, ecocolor Doppler evaluation; in the right side, computed Tomography view of ascending aortic aneurysm. Abbreviations: MFS, Marfan syndrome; non-MFS, non Marfan syndrome; TAA, thoracic aorta aneurysm.

**Supplemental Figure II. Histological analysis of control aorta, MFS and non-MFS TAA.** Representative aortic media sections stained with Haematoxylin&Eosin (H&E) show accumulation of basophilic material in the intimal and medial tunica of non-MFS and MFS TAA compared with control. Bar graphs of morphometric evaluations concerning intimal and medial thickness. Abbreviations: MFS, Marfan syndrome; non-MFS, non Marfan syndrome; TAA, thoracic aorta aneurysm.

**Supplemental Figure III. MMP2 activity, cellularity, vascular precursors and inflammatory recruitment in the tunica media of MFS TAA, non-MFS TAA and control aorta.** (A) Densitometric analysis in uOD (unit optical density) values of MMP-2 gelatinase activity (N=5/group). B) Bar graph shows the cellularity (number of cells/ mm<sup>2</sup>) in the tunica media of MFS TAA, non-MFS TAA and control aorta. (C) Bar graph shows perivascular CD133<sup>+</sup> cell density (number of cells/ mm<sup>2</sup>) in the tunica media of MFS TAA, non-MFS TAA and control aorta. (D) Semiquantitative evaluation of inflammatory cell infiltrate in outer media and adventitia documents the increase of CD4<sup>+</sup> and CD68<sup>+</sup>. MFS TAA (N=20), non-MFS TAA (N=20) and control aorta (N=10). Average are reported as means  $\pm$  SEM; \*P<0.05; \*\*P<0.01; \*\*\*P<0.001; estimated by t-test. Abbreviations: uOD, unit optical density; MFS, Marfan syndrome; non-MFS, non Marfan syndrome; TAA, thoracic aorta aneurysm.

**Supplemental Figure IV. Morphological and phenotypic features of cultured HASMCs from non-MFS and MFS TAA *in vitro*.** (A) Phase contrast micrographs at third passage of

cultured HASMCs from non-MFS and MFS TAA; scale bar =150  $\mu$ m. Immunofluorescence staining shows  $\alpha$ -SMA and fibrillin-1 expression in both cultures; scale bar =100  $\mu$ m. (B) Representatives blots and bar graphs of  $\alpha$ -SMA and fibrillin-1 expression in cultured HASMCs and HAFs from non-MFS and MFS TAA (N=3/group). Average are reported as means  $\pm$  SEM; \* $P< 0.001$ ; estimated by *t*-test. Abbreviations: HASMCs, human aortic medial-derived smooth muscle cells; HAFs, human aortic fibroblasts; MFS, Marfan syndrome; non-MFS, non Marfan syndrome; TAA, thoracic aorta aneurysms;  $\alpha$ -SMA,  $\alpha$ -smooth muscle actin;  $\alpha$ -tub,  $\alpha$ -tubulin; ADU, arbitrary densitometry units.

**Supplemental Figure V. Increased proliferation and apoptosis characterize cultured HASMCs from MFS TAA.** (A) Representative images and (B) semiquantitative evaluation of Ki67 immunocytochemistry (dark brown nuclei, arrowheads) and *In situ* end-labeling of DNA fragments by TUNEL assay (dark brown nuclei, arrows) in non-MFS and MFS HASMCs cultures (N=5/group). Scale bar equals to 100 $\mu$ m. Scale bar equals to 50 $\mu$ m. Average are reported as means  $\pm$  SEM; \*  $P<0.01$ ; estimated by *t*-test.

**Supplemental Figure VI. Gene deregulation in MFS TAA media tissue.** Gene deregulation in MFS TAA expressed as fold change of non-MFS TAA (MFS TAA, N=4; non-MFS TAA, N=2).

**Supplemental Table 1. Up and down-regulated miRNAs in MFS TAA.**

miRs	Fold Change
hsa-miR-632	13,51
hsa-let-7f-5p	-6,82
hsa-miR-101-3p	-7,47
hsa-miR-125a-3p	-2,91
hsa-miR-1	-3,64
hsa-miR-1537	-8,52
hsa-miR-199b-5p	-75,42
hsa-miR-217	-4,19
hsa-miR-25-3p	-2,76
hsa-miR-27a-3p	-83,49
hsa-miR-27b-3p	-8,03
hsa-miR-28-3p	-2,82
hsa-miR-29c-3p	-18,77
hsa-miR-302d-3p	-2,40
hsa-miR-30d-5p	-33,40
hsa-miR-338-3p	-3,93
hsa-miR-378a-3p+hsa-miR-378i	-14,08
hsa-miR-4461	-24,91
hsa-miR-515-5p	-5,05
hsa-miR-525-3p	-11,36
hsa-miR-592	-9,18
hsa-miR-614	-3,69
hsa-miR-890	-12,61
hsa-miR-26a-5p	-13,07
hsa-miR-29b-3p	-40,96
hsa-miR-145-5p	-3,82
