

Table S1. The p values from comparisons between experimental groups (film + challenge and respective positive control group) for Log10 ACoV RNA copies and qualitative results (virus isolation and RT-qPCR).

	Parameter	Hands	Inanimate surface
High challenge	RT-qPCR (quantitative)	0.0041	0.0028
	Virus isolation	0.0152	0.0022
	RT-qPCR (qualitative)	0.0022	0.0022
Intermediate challenge	RT-qPCR (quantitative)	0.0028	0.0021
	Virus isolation	0.0022	0.0152
	RT-qPCR (qualitative)	0.0022	0.0022
Low challenge	RT-qPCR (quantitative)	0.0021	0.0015
	Virus isolation	0.0152	0.0013
	RT-qPCR (qualitative)	0.0022	0.0025
