effectiveness and affordability for use in national guideline development. *Addiction*, 110, 1388-1403. doi:10.1111/add.12998

Zhu, H., Zhu, Y., & Leung, S. (2016). Is self-monitoring of blood glucose effective in improving glycaemic control in type 2 diabetes without insulin treatment: A meta-analysis of randomised controlled trials. *BMJ*, 6. doi:10.1136/bmjopen-2015-010524

Supplemental 3. Tables and Figures

Table 1.

Coding definitions and examples for self-regulation intervention components

Component	Definition used for coding	Examples
Goal setting	Goal setting outcome and goal setting behaviour	<ul style="list-style-type: none"> • “Step goal”, “facilitate goal setting”, “subject-generated written or oral medication adherence behavioral goals”, “the setting of graded tasks” • “T10. Prompt specific goal setting” (Michie et al., 2009) • Person is encouraged to set a general goal that can be achieved by behavioural means but is not defined in terms of behaviour (e.g., to reduce blood pressure or lose/maintain weight), as opposed to a goal based on changing behaviour as such (French et al., 2014) • Goal setting defined as the 'setting of specific goals aimed at improving compliance with hand hygiene, which can both apply at individual and group level and can include healthcare associated infection rates' (Luangasanatip et al., 2015) • Subject-generated written or oral medication adherence behavioral goals—sometimes with action plans (Conn, Ruppar, 2017)
Implementation intentions	Implementation intention interventions	<ul style="list-style-type: none"> • “Goal intentions furnished with specific action plans” (Adriaanse et al., 2011)
Prompt review of goals	Review behavioural goals or outcome goals	<ul style="list-style-type: none"> • T11: Prompt review of behavioral goals: review and/or reconsideration of previously set goals or intentions (Tyson et al., 2014) • Prompt review of outcome goals (BCT 11) Sykes-Muskett et al., 2015) • “Behavior goal review” (O'Brien et al., 2015)
Prompt self-monitoring	Self-monitoring of behaviour and self-monitoring of outcome	<ul style="list-style-type: none"> • T12. Prompt self-monitoring of behavior: The person is asked to keep a record of specified behaviors (e.g., in a diary) (Tyson et al., 2014) • Prompt self-monitoring of behaviour (BCT 16) • Prompt self-monitoring of behavioural outcome (BCT 17) • “Self-measurement of blood pressure” (Bray et al., 2010); “Subjects record their medication behavior, sometimes using medication diaries” (Conn & Ruppar, 2017); “step diary” (Bravata et al., 2007); “Use of exercise logs” (Higgins et al., 2014) • Self-monitoring as an intervention component measured through exercise logs, heart rate monitors (to determine exercise intensity) or pedometers (Lim et al., 2015) • Monitoring behavior and monitoring outcomes (Harkin et al., 2016) • Self-measurement of blood pressure without medical professional input, if usual care did not include patient self-monitoring (Bray et al., 2010)

		<ul style="list-style-type: none"> “BS - Specific focus on behaviour, maximizing self-regulatory capacity/skills” (Bartlett, Sheeran, & Hawley, 2014) ‘The person is asked to keep a record of specified behaviors’ (Brannon & Cushing, 2015) Self-monitoring as an intervention component in mHealth interventions through text messaging or phone apps (Darling & Sato, 2017)
Emotional control training/Inhibitory control training	Emotional control training BCT Inhibitory control training	<ul style="list-style-type: none"> “Inhibitory control training task (Stop Signal, Go/No- Go, and Antisaccade)” (Jones et al., 2016); “food-specific inhibition training (Stop-signal training and Go/no go training)” (Turton et al., 2016) “Emotional control training such as the go/no-go task (GNG) or the stop-signal task (SST) which is used to strengthen inhibitory control” (Allom et al., 2016)
Prompt self-talk	Prompt self-talk BCT	<ul style="list-style-type: none"> “BS6 - Prompt self-recording” (Bartlett et al., 2014)
Stress management	Stress management BCT Emotional control training	<ul style="list-style-type: none"> Stress management/emotional control training: This is a set of specific techniques (e.g., progressive relaxation) that do not target the behaviour directly but seek to reduce anxiety and stress to facilitate the performance of the behaviour (French et al., 2014) Teaching subjects stress-reduction methods, including coping skills, relaxation methods, anger-management, and mindfulness techniques (Conn & Ruppar, 2017)
Action planning	Action planning BCT	<ul style="list-style-type: none"> “BS3 - Facilitate action planning/develop treatment plan” (Bartlett et al., 2014); “Action and coping plans” (Bélanger-Gravel et al., 2013); “Strategy planning (goal-related BCTs)” (McEwan et al., 2016) Action planning: involves detailed planning of what the person will do including, as a minimum, when, in which situation and/or where to act (French et al., 2014) “COPD self-management interventions that included a written action plan for acute exacerbations of COPD” (Lenferink et al., 2017)
Barrier identification /Problem solving	Problem solving BCT Prompt barrier identification Barrier identification/Problem solving	<ul style="list-style-type: none"> “Problem solving: Studies have used problem solving as a multidimensional construct, comprising both effective and ineffective problem-solving strategies, emotional and cognitive orientation to problem solving, ability to learn from past experience, and environmental context. Problem solving was checked only if problem solving was specifically mentioned in the article, even if a description of problem solving was not provided.” (Bolen et al., 2014) Prompt barrier identification: identify barriers to performing the behavior and plan ways of overcoming them (Tyson et al., 2014); “self-management skills” (Albarracin et al., 2008)

		<ul style="list-style-type: none"> • Barrier identification/problem solving: This presumes having formed an initial plan to change behaviour. The person is prompted to think about potential barriers and identify ways of overcoming them (French et al., 2014) • 'Facilitate barrier identification and problem solving' (Bartlett et al., 2014): "Identification of high-risk situations" (Scott-Sheldon et al., 2014) • Specifically address barriers to adherence and adherence problem solving (Conn et al., 2015) • "Barrier management: The management of barriers was determined based on the definition provided by Abraham and Michie (2008) in the taxonomy of theoretical techniques for behaviour change." (Bélanger-Gravel et al., 2013)
Relapse prevention/coping planning	Relapse prevention/coping planning	<ul style="list-style-type: none"> • Relapse prevention: following initial change, help identify situations likely to result in readopting risk behaviors or failure to maintain new behaviors, and help the person plan to avoid or manage these situations (Tyson et al., 2014) • Relapse prevention/coping planning: This relates to planning how to maintain behaviour that has been changed. The person is prompted to identify in advance situations in which the changed behaviour may not be maintained and develop strategies to avoid or manage those situations (French et al., 2014) • "On-demand messaging services for additional support" (Spohr et al., 2015)
Time management	Time management BCT	<ul style="list-style-type: none"> • T26. Time management (Michie et al., 2009)
Provide feedback	BCT 2.2 - Feedback on behaviour BCT 2.7 - Feedback on outcome of behaviour Provide feedback on performance (BCT 19)	<ul style="list-style-type: none"> • "Feedback: an intervention that includes a review process following some intervention (e.g., education)" (Sherifali et al., 2015) • "Direct feedback to patients" (Ebbert et al., 2007); "Intervention component based on electronically monitored adherence feedback" (Demonceau et al., 2013); "Feedback intervention component (goal-related BCTs)" (McEwan et al., 2016); "Personalized feedback" (Scott-Sheldon et al., 2014) • "Feedback about subjects' adherence scores and feedback about blood pressure" (Conn et al., 2015); "Interventions that included assessment messages" (Spohr et al., 2015)

Note. BCT = behaviour change technique.

Table 2

Results of Methodological Quality for each Meta-Analysis Using the AMSTAR 2 Instrument

Meta-analysis

Meta-analysis

Note. NA=Not applicable. NRSI=Non-randomized studies of interventions. PICO=Defined Problem/Patient/Population, Intervention/Indicator, Comparison, Outcome. PRISMA: Moher et al.'s reporting standards. PY=Partial yes. RCT=Randomized controlled trial. RoB=Risk of bias. Y=Yes. X=Item was reported by review authors and was used to determine AMSTAR 2 tool item rating.

Table 3.

Correlations of methodological quality scores (proportion of relevant AMSTAR 2 items satisfied) with other methodological variables of interest ($l = 66$)

Dimension	1	2	3	4	5
1. Methodological quality	—
