

**Fig. S2** The results of the analyses performed using the SCAR markers specific for the mutations in the *BnaA.FAD2* gene of rapeseed for the basic set of 24 rapeseed lines (see Materials and Methods for the description of each line). The arrows indicate the amplified DNA fragments, and their colors correspond to the colors used for the display of each mutation shown in Fig. 1 [30]

### Molecular Biology Reports

**Cleaved amplified polymorphic sequences (CAPS) marker for identification of two mutant alleles of the rapeseed *BnaA.FAD2* gene**
