

Supplementary figure 1. Uncropped membrane scans represented in Figure 1C. (A) The WB of CCL2 protein (14kDa) highlighted with red dashed box in Fig 1C. (B) Uncropped membrane scans of β -Actin. The β -Actin protein was detected by the same membrane used in the experiment for CCL2 detection. Western blot data used in Fig. 1C were used by editing control and CCL2 overexpressing hUC-MSC data.
