

How Much Does That Test Cost?

Figures based on CHA PHIS cost and charge data

Laboratory Test Name	Estimated Cost
14 Test Chemistry Panel (Complete Metabolic Panel)	\$50
8 Test Chemistry Panel (Basic Metabolic Panel)	\$45
8 Test Chemistry Panel with Ionized Calcium	\$54
Electrolyte Panel	\$33
Kidney Panel (Renal Function Panel)	\$45
Calcium	\$8
Carbon Dioxide (CO ²)	\$11
Chloride	\$8
Ionized Calcium	\$32
Magnesium	\$21
Phosphorus	\$16
Potassium	\$12
Sodium	\$12

Cost = Indirect Cost + Direct Cost

Indirect Cost: Cost of keeping the lights on, taxes, etc.

Direct Cost: Cost of running the lab

FAQ's about "Add-Ons"

1. When ordering electrolytes, you have 12 hours to add additional studies
2. The electrolytes most likely to change while sitting in lab are:
K⁺, glucose, CO²

Please note that costs are estimated based on charge data and do not reflect actual charges for a lab test.
