Title: A molecular map of lung neuroendocrine neoplasms

Version: Original Submission **Date:** 3/11/2020

Reviewer name: Saurabh V Laddha

Reviewer Comments to Author:

The study is well written and present interesting Omics dataset for lung neuroendocrine tumors(LNETs). As these tumors are rare in nature, it is important to create such resources for researcher.

Minor Revision:

- Using genomics datase, author should able to comment on the tumor purity and provide a table. This is also one important data note for this cancer type.
- Chan CS et al., (PMID:31300474) recently found three novel molecular subtypes of Lung Carcinoids. Authors should consider this dataset and integrate with all lung dataset to enrich for sample size and also one shop center for this cancer type for researcher.
