## Clinic and Polyclinic for Visceral, Thoracic and Vascular Surgery

Clinic director: Prof. Dr. Jürgen Weitz

University Hospital Carl Gustav Carus - Fetscherstr. 74 - 01307 Dresden

Dear Colleague

New information and communication technologies (ICT), such as smartphones, apps and cloud services, are changing our private and professional everyday life forever. ICT applications, such as health apps on the smartphone, are also being used more and more frequently in the healthcare sector.

At the same time, there are many ambiguities related to the use of these technologies and applications, in particular regarding the reliability of information, security and privacy aspects.

The purpose of this survey is to get an overview of the actual use by physicians, the existing knowledge about these technologies and the evaluation of possible practical applications.

Answering the questions should not take more than 5-10 minutes. We would like to thank you very much for your assistance by filling in the anonymous questionnaire.

Your  
Ulrich Bork

If you have any further questions about the project, I am available for you questions:
