

Impact of fatigue, pain and bowel incontinence on the quality of life of people living with Inflammatory Bowel Disease: a UK cross-sectional survey

Supplementary material

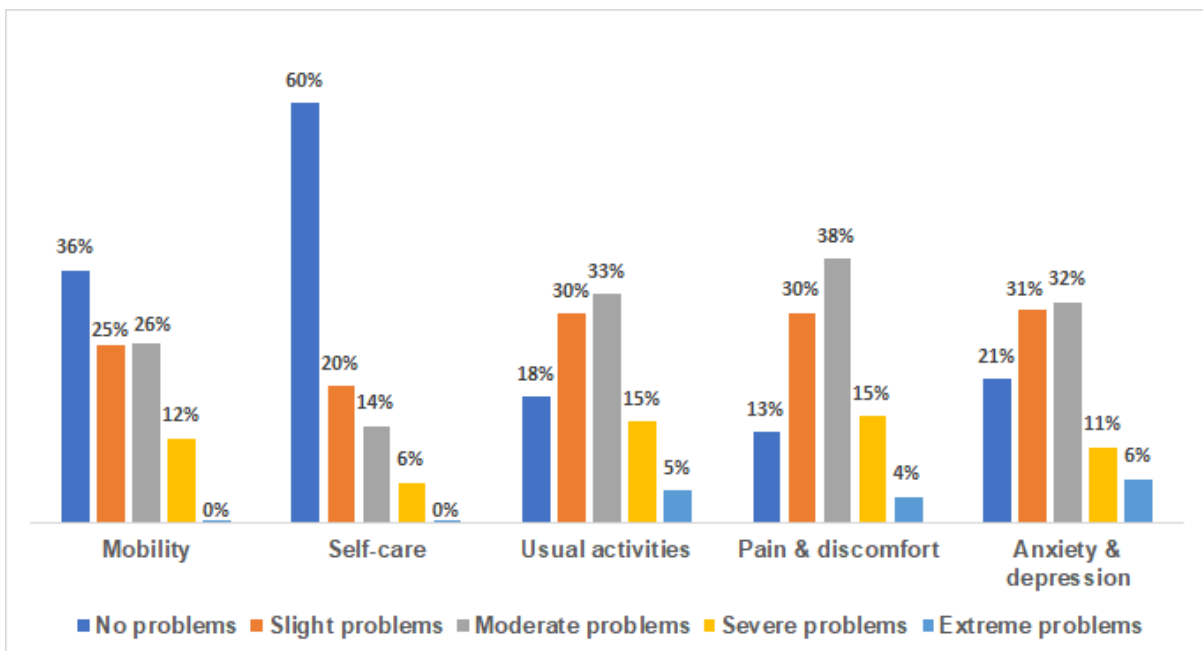

Supplementary Figure S1: Distribution of EQ-5D-5L domains by IBD-related reported symptom	2
Supplementary Table S1: Definitions of variables included for selection in the final statistical model.....	4
Supplementary Table S2: Model specifications for impact of IBD symptoms on HRQoL	6
Supplementary Table S3: Socio-demographic characteristics of the 8486 IBD-BOOST survey participants	9
Supplementary Table S4: Clinical characteristics of 8486 participants included in the IBD-BOOST survey by IBD diagnosis	11
Supplementary Table S5: Quality of life (EQ-5D utility) associated with IBD patients' socio-demographic and clinical characteristics (Initial QoL model).....	13
Supplementary Table S6: Quality of life (EQ-5D utility) associated with IBD patients' socio-demographic, clinical characteristics and severity of symptoms of fatigue, pain and bowel incontinence (N=8486 participants)	14
Supplementary Table S7: Quality of life (EQ-5D utility) associated with IBD patients' socio-demographic, clinical characteristics, symptoms of fatigue, pain and bowel incontinence and interactions with anxiety and depression (N=8486 participants)	16
Supplementary Table S8: Quality of life (EQ-5D utility) associated with IBD patients' socio-demographic, clinical characteristics, symptoms of fatigue, pain and bowel incontinence, anxiety and depressions and IBD activity and control (N=8486).....	18
Supplementary Table S9: Quality of life (EQ-5D utility) associated with socio-demographic, clinical characteristics, symptoms of fatigue, pain and bowel incontinence and with anxiety and depression, by IBD type	21
Supplementary Table S10: Quality of life (EQ-5D utility) associated with socio-demographic, clinical characteristics, symptoms of fatigue, pain and bowel incontinence and with anxiety and depression, by gender	24

Supplementary Figure S1: Distribution of EQ-5D-5L domains by IBD-related reported symptom

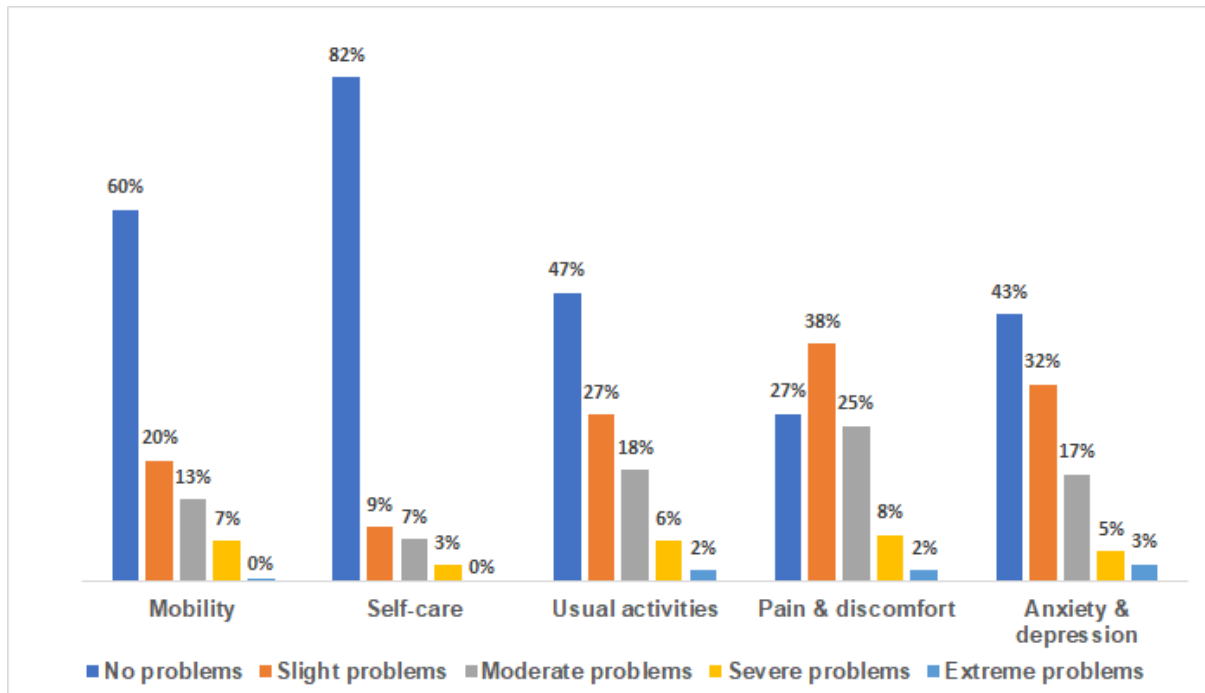

a) EQ-5D domains among IBD participants with pain

b) EQ-5D domains among IBD participants with fatigue

c) EQ-5D domains among IBD participants with incontinence

Supplementary Table S1: Definitions of variables included for selection in the final statistical model

Variables	Categories (if categorical)	Note
IBD type	Crohn's disease or Crohn's colitis Other type of IBD	
Age	18-25, 26-35, 36-45, 46-55, 56-65, 66 and over	
Gender	Male, Female	
Smoking status	Never smoked, Ex-smoker, Current smoker	
IMD quintile	1 (most deprived), 2, 3, 4, 5 (least deprived)	Measure of socioeconomic status calculated using self-reported postcode.
BMI (kg/m ²)	<25, >=25-<30, >=30-<35, >=35	Based on self-reported height and weight
IBD surgery in the past	Yes/No	
IBD biologic medication	Yes/No	
IBD activity score or Stoma/pouch	1 (low activity), 2, 3 (high activity), 4 (stoma/pouch)	Tertiles in study population
IBD control score	1 (best control), 2,3 (worst control)	Tertiles in study population
Physical health comorbidity	Yes/No	
Mental health comorbidity	Yes/No	
Time since IBD diagnosis (in years)	0-3, >4	
Currently pregnant	Yes/No	
Education level	No formal education, School (GCSE or AS/A-levels), Further and higher education	
Employment status	Employed, Unemployed due to illness, Unemployed, Student or homemaker, Retired	
Relationship status	Living alone, Living with someone	
Fatigue	0-59 (no fatigue), 60 and over (fatigue)	PROMIS fatigue score (dichotomised)
Pain	0-59 (no pain), 60 and over (pain)	PROMIS pain score (dichotomised)
Incontinence	0-4 (no incontinence), 5-20 (incontinence)	PROMIS Gastrointestinal Bowel Incontinence score (dichotomised)
Anxiety	0-4 (no anxiety), 5-9 (mild anxiety), 10-21 (moderate to severe anxiety)	GAD-7 scale for anxiety
Depression	0-4 (no depression), 5-9 (mild to moderate depression), 10- 27(moderately severe depression)	PHQ-9 scale for depression

Abbreviations: IBD: Inflammatory bowel disease; IMD: Indices of Multiple Deprivation; BMI: Body Mass Index; PROMIS: Patient-Reported Outcomes Measurement Information System; GAD-7: Generalised Anxiety Disorder Assessment; PHQ-9: Patient Health Questionnaire.

Supplementary Table S2: Model specifications for impact of IBD symptoms on HRQoL

Outcome	Model	Key exposures	Further predictors	Confounders:
