

Supplementary Figure S10

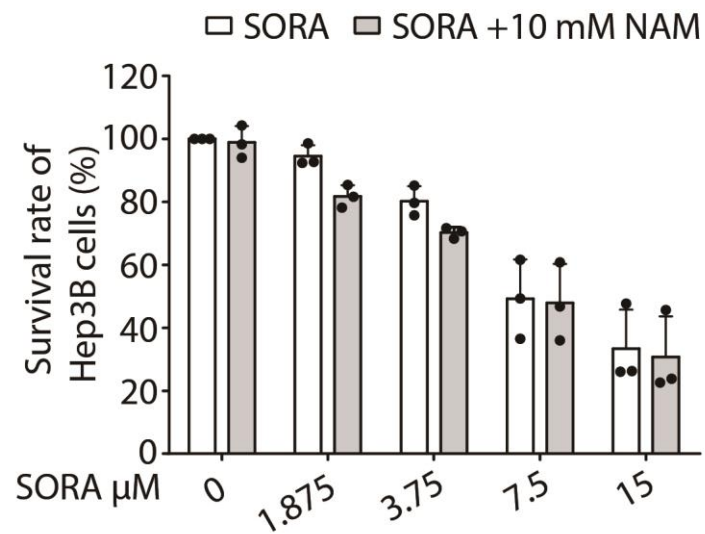

Fig. S10 Nicotinamide does not affect sorafenib-induced Hep3B cell death.

Hep3B cells were treated with 0-15 μM sorafenib with or without nicotinamide 10 μM for 72 h. Cell survival rate was detected by SRB colorimetric assay (N = 3). Data are expressed as the mean \pm SD. SORA, sorafenib; SRB, sulforhodamine B, NAM, nicotinamide.
