

Figure S1. Influence of PVT1 silencing on the level of PVT1 of exosome-induced C28/I2 cells. (A) The expression of PVT1 in C28/I2 cells after PBS or exosome treatment was detected by RT-qPCR. (B) The expression of PVT1 in exosome-induced C28/I2 cells transfected with si-NC or si-PVT1 was analyzed with RT-qPCR. * $P < 0.05$. PVT1, plasmacytoma variant translocation 1; RT-qPCR, reverse transcription-quantitative PCR; si, short interfering RNA; NC, negative control.
