

Supplementary Table 1. Antibodies used in direct immunofluorescence assays to detect bovine viruses in fetal bovine serum.

Virus	Antibody	Provider
Bluetongue virus	Bluetongue virus (BTV) direct fluorescent antibody conjugate	VMRD
Bovine adenovirus	Bovine adenovirus 5 (BAV-5) direct fluorescent antibody conjugate Bovine adenovirus 3 (BAV-3) direct fluorescent antibody conjugate	American BioResearch
Bovine herpesvirus 1	Bovine herpesvirus 1 (BoHV-1) direct fluorescent antibody conjugate	VMRD
Bovine parainfluenza virus 3	Bovine parainfluenza 3 (BPIV-3) direct fluorescent antibody conjugate	VMRD
Bovine parvovirus	Bovine parvovirus (BPV) direct fluorescent antibody conjugate	VMRD
Bovine respiratory syncytial virus	Bovine respiratory syncytial virus (BRSV) direct fluorescent antibody conjugate	American BioResearch
BVDV-1, -2, and HoBi-like virus	Bovine viral diarrhea virus (BVDV) direct fluorescent antibody conjugate	VMRD
Rabies	Conjugado antirrábico 15/06/047	SENASA
Reovirus	Reovirus 1, 2, and 3 (REO1-3) direct fluorescent antibody conjugate	American BioResearch
