

Supplemental Figure S1. Structures of major fumonisins, representative LCBs and AAL toxin.

A. Comparison of the structures of FBs with sphinganine, sphingosine and phytosphingosine. The fumonisins B1 (FB1), B2, and representative long-chain bases (LCBs) are shown with highlighting of the sphingoid base-like portion in purple. B. Structures of *Alternaria alternata* f.sp. *lycopersici* (AAL) toxin TD1.
