

On-line Table: Patient demographics, procedural characteristics, and posttreatment complications

| Patient No. | Age (yr)/Sex | Cause of Occlusion | Prestroke Antiplatelet Therapy | IV Thrombolysis | Site of Stent Placement | Tandem Occlusion | Concomitant Intraoperative Aspirin | Reperfusion Hemorrhage (Type) | Intraoperative SAH or Vessel Perforation | In-Stent Thrombosis |
|-------------|--------------|--------------------|--------------------------------|-----------------|-------------------------|------------------|------------------------------------|-------------------------------|--|---------------------|
| 1 | 75/F | Atheromatous | | No | Extracranial | Yes | No | No | No | No |
| 2 | 64/M | Atheromatous | | No | Extracranial | Yes | No | No | No | No |
| 3 | 64/M | Atheromatous | | No | Extracranial | Yes | Yes | No | Yes | No |
| 4 | 61/M | Atheromatous | | Yes | Extracranial | Yes | No | No | No | No |
| 5 | 78/M | Atheromatous | | Yes | Extracranial | Yes | No | No | Yes | No |
| 6 | 64/M | Atheromatous | | No | Extracranial | Yes | No | No | No | No |
| 7 | 63/F | Atheromatous | Aspirin | Yes | Extracranial | No | Yes | No | No | No |
| 8 | 85/F | Atheromatous | | No | Intracranial | No | Yes | No | No | No |
| 9 | 36/F | Dissection | | Yes | Extracranial | Yes | No | No | Yes | No |
| 10 | 54/F | Dissection | Other anti-P2Y12 | No | Intracranial | No | No | No | No | No |
| 11 | 71/M | Atheromatous | Anti-coagulation | No | Intracranial | No | Yes | No | No | Yes |
| 12 | 56/M | Atheromatous | Dual-antiplatelet | Yes | Extracranial | Yes | No | No | No | No |
| 13 | 63/F | Atheromatous | | No | Intracranial | No | Yes | No | No | No |
| 14 | 81/F | Atheromatous | Other anti-P2Y12 | Yes | Intracranial | No | No | No | No | Yes |
| 15 | 62/M | Atheromatous | | Yes | Extracranial | Yes | No | No | Yes | No |
| 16 | 61/M | Atheromatous | Other anti-P2Y12 | Yes | Extracranial | Yes | No | No | No | No |
| 17 | 56/M | Atheromatous | | No | Extracranial | No | Yes | Yes (PH2) | No | No |
| 18 | 80/M | Atheromatous | | Yes | Extracranial | Yes | Yes | No | No | No |
| 19 | 46/F | Dissection | | No | Extracranial | Yes | No | No | No | No |
| 20 | 69/M | Atheromatous | | No | Extracranial | Yes | Yes | Yes (PH1) | No | No |
| 21 | 67/M | Atheromatous | | No | Extracranial | Yes | No | No | No | No |
| 22 | 53/M | Dissection | | No | Intracranial | No | Yes | No | No | No |
| 23 | 72/M | Atheromatous | Dual-antiplatelet | No | Extracranial | Yes | No | Yes (PH2) | No | No |
| 24 | 64/M | Atheromatous | Aspirin | Yes | Intracranial | No | No | No | No | No |
| 25 | 39/F | Dissection | | Yes | Intracranial | Yes | No | No | No | No |
| 26 | 26/F | Dissection | | Yes | Intracranial | No | Yes | No | No | No |
| 27 | 80/M | Atheromatous | | No | Extracranial | No | No | No | No | No |
| 28 | 76/M | Atheromatous | | Yes | Extracranial | Yes | No | No | No | No |
| 29 | 78/M | Atheromatous | | Yes | Extracranial | Yes | No | No | No | No |
| 30 | 73/F | Atheromatous | | No | Intracranial | No | No | No | No | No |
| 31 | 79/M | Atheromatous | Aspirin | No | Extracranial | Yes | No | No | No | No |
| 32 | 73/F | Atheromatous | | No | Extracranial | Yes | Yes | No | No | No |
| 33 | 77/F | Atheromatous | | Yes | Extracranial | Yes | No | No | No | No |
| 34 | 61/M | Atheromatous | Aspirin | No | Intracranial | No | No | Yes | No | No |
| 35 | 55/M | Atheromatous | | No | Intracranial | No | No | No | No | Yes |
| 36 | 66/M | Atheromatous | Aspirin | Yes | Extracranial | Yes | No | No | No | Yes |
| 37 | 60/M | Atheromatous | | No | Extracranial | Yes | No | No | No | No |
| 38 | 52/M | Atheromatous | | No | Extracranial | Yes | No | No | No | No |

Note:—PH1 indicates hematoma within infarcted tissue, occupying <30%, no substantive mass effect; PH2, hematoma occupying 30% or more of the infarcted tissue, with obvious mass effect.
