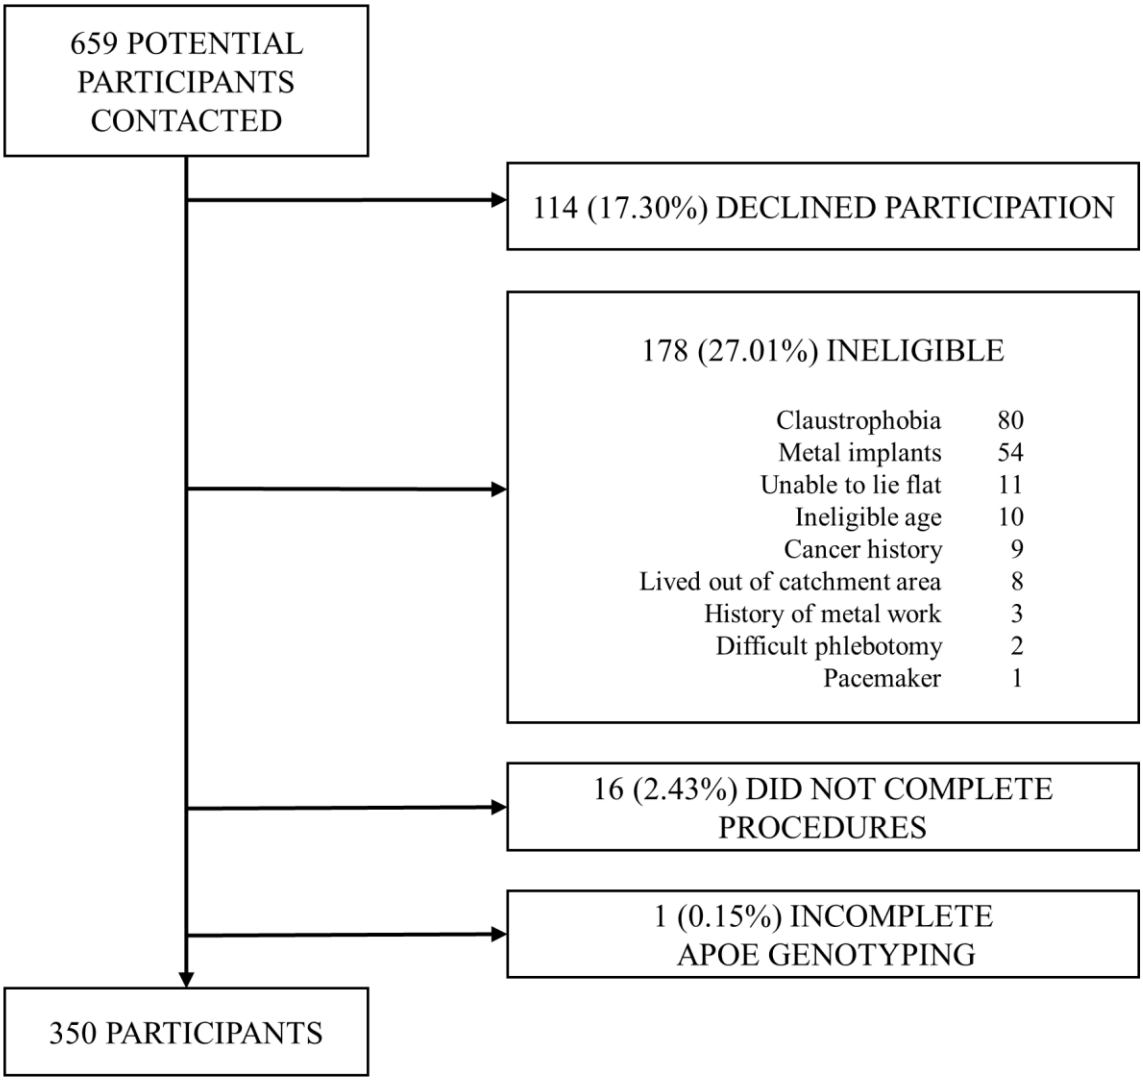
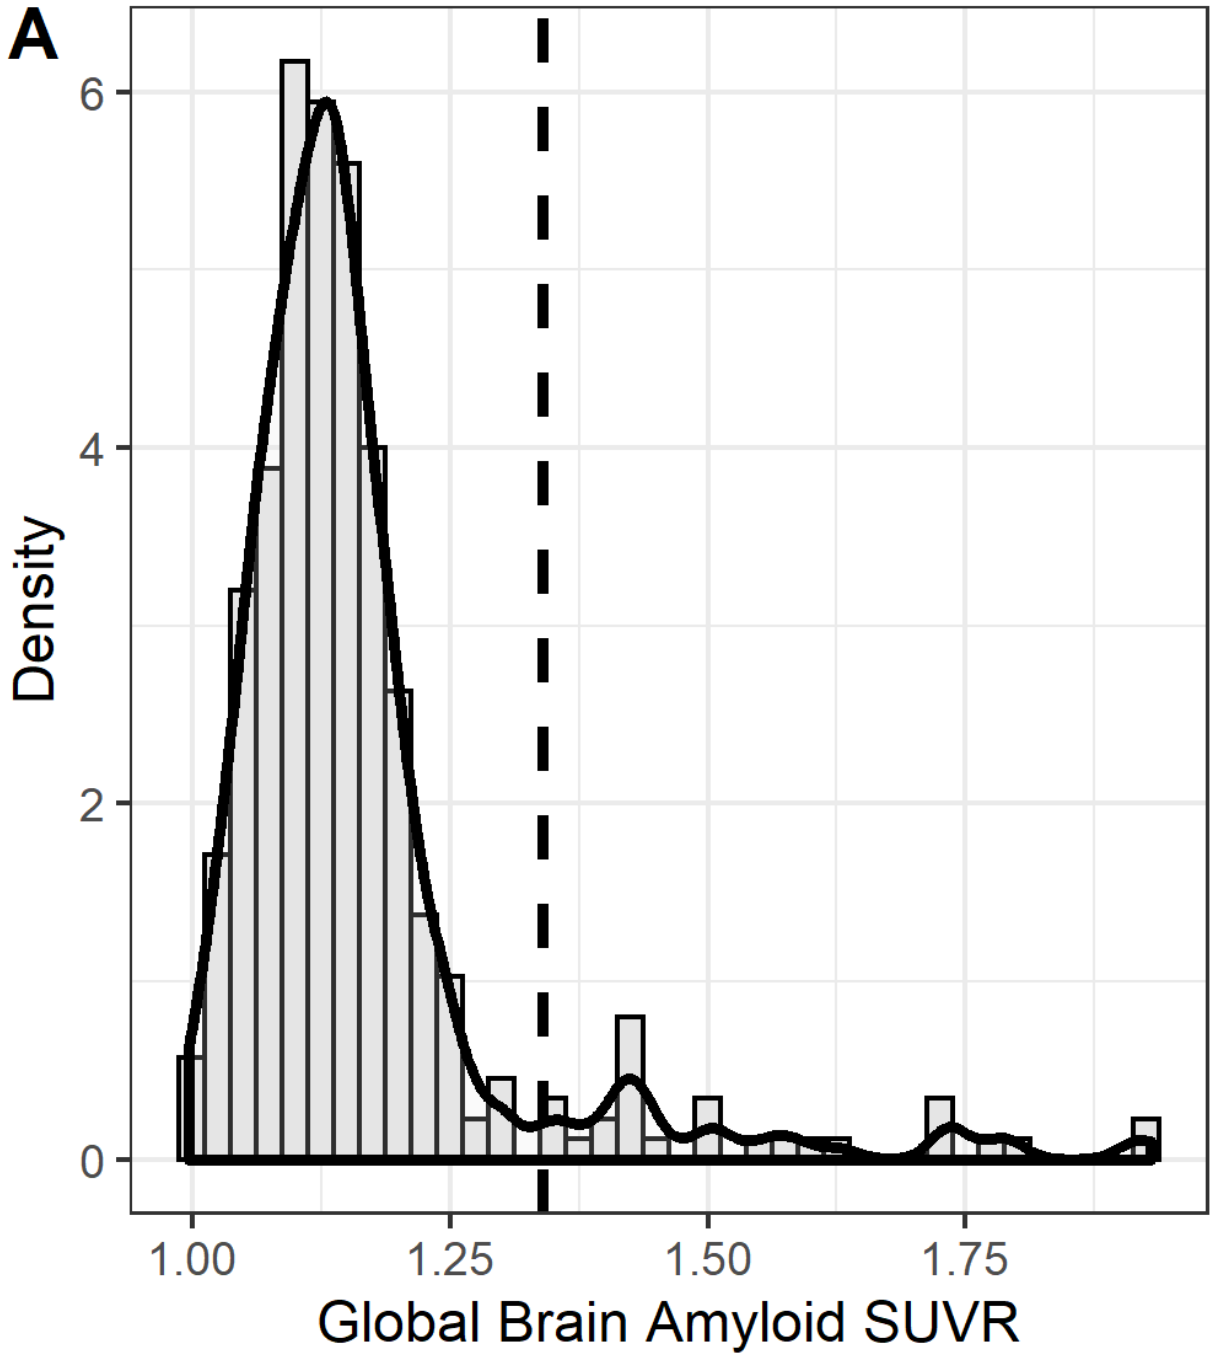
Supplemental Figure 1. Flowchart of study recruitment



659 POTENTIAL PARTICIPANTS CONTACTED
114 (17.30%) DECLINED PARTICIPATION
178 (27.01%) INELIGIBLE
Claustrophobia 80
Metal implants 54
Unable to lie flat 11
Ineligible age 10
Cancer history 9
Lived out of catchment area 8
History of metal work 3
Difficult phlebotomy 2
Pacemaker 1
16 (2.43%) DID NOT COMPLETE PROCEDURES
1 (0.15%) INCOMPLETE APOE GENOTYPING
350 PARTICIPANTS


Supplemental Figure 2. Histograms showing the distribution of global brain amyloid standardized uptake value ratio (SUVR), with a solid line representing a non-parametric Kernel estimation. The dash line represents the amyloid positivity threshold (1.34) estimated using K means clustering.
