

# Supplementary Figures

## Figure S1

Figure S1: Methylation levels of genome-wide significant CpG sites (cord blood EWAS) in brain and blood tissue of 16 participants in the BECon database.

# Figure S2

Figure S2: Scatterplot of genome-wide significant CpG sites (birth methylation EWAS) in the Generation R Study. Red indicates ADHD levels at age 6, green at age 8 and blue at age 10.
