

TABLE 1 QUALITATIVE BEHAVIOR ASSESSMENT

Table S1: Presented are the mean values of the Area under curve (AUC) per term of the Qualitative Behavior Assessment over the whole assessment period of 20 weeks. Means \pm SE are given per genotype (Lohmann Brown LB, Lohmann Dual LD, Rhinelander RL), including statistics. The highest possible value would be 4.828 based on calculations with minimum vs. maximum VAS value. For details, see the Methodology section.
