HbA1c, glycohemoglobin; eGFR, estimated glomerular filtration rate; T2D, type 2 diabetes; SGLT2, sodium-glucose co-transporter 2; hypoglycemia (+), patients with hypoglycemic events; hypoglycemia (-), patients without hypoglycemic events; SD, standard deviation; BMI, body-mass index;  $\alpha$ -GI, alpha-glucosidase inhibitor; DPP-4, dipeptidyl peptidase-4; GLP-1, glucagon-like peptide-1. P values were calculated for differences between patients with and without hypoglycemic events.
