

S2. Supplemental Table 1. Slope of change in diastolic blood pressure, before and after three months after initiating care.

	Estimate (95% CI)	P Value
Slope before 3 months		
Nurse	-2.37 (-3.24 to -1.50)	<.0001
Clinical Officer	-2.45 (-2.83 to -2.07)	<.0001
Nurse - Clinical Officer	0.08 (-0.87 to 1.02)	0.8748
Slope after 3 months		
Nurse	-0.28 (-0.58 to 0.01)	0.0596
Clinical Officer	0.07 (-0.06 to 0.20)	0.2774
Nurse - Clinical Officer	-0.35 (-0.67 to -0.03)	0.0307
Change in slope from before to after 3 months		
Nurse	2.09 (1.01 to 3.16)	<.0001
Clinical Officer	2.52 (2.06 to 2.98)	<.0001
Nurse - Clinical Officer	-0.43 (-1.60 to 0.74)	0.4714

Model parameter estimates based on piecewise linear mixed-effect models with random intercept and slopes and a knot placed at 3 months, adjusted by age, sex, and healthcare center.
