

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: A list of genes that are differentially expressed in each of the 11 thymic C57BL/6 iNKT clusters. Only differentially expressed genes enriched in each cluster of cells with an adjusted p-value (using the Benjamini-Hochberg correction) below 0.05 were retained.

File Name: Supplementary Data 2

Description: A list of genes that are differentially expressed between C57BL/6 and Hivp3^{-/-} iNKT cells for each of the 10 clusters. Only differentially expressed genes between strains within each cluster with an adjusted p-value (using the Benjamini-Hochberg correction) below 0.05 were retained.

File Name: Supplementary Data 3

Description: A list of genes that are differentially expressed in each of the 12 clusters yet conserved between C57BL/6 thymic iNKT and MAIT cells. Only differentially expressed genes enriched in each cluster of cells with an adjusted p-value (using the Benjamini-Hochberg correction) below 0.05 were retained.
