

Description of Additional Supplementary Files

Supplementary Movie 1: Time-lapse recording of a growing clonal colony demonstrates high mobility of thymic epithelial cells (TEC). Images were acquired over a period of 4 days.

Supplementary Movie 2: 3D video rendering of a cannulated rat thymus generated from micro-CT data. A superior-inferior clipping plane has been applied to the data, this demonstrates differentiation of cortex and medullary structures following administration of I₂KI contrast prior to the scan. Video prepared using VG Studio MAX (Heidelberg, Germany).
