

Temporal Density

Supplementary Data SD7-1. Circadian activity density of 8 prey species based on all survey sites 2010-2019: (A) porcupine, (B) skunk, (C) paca, (D) agouti, (E) armadillo, (F) common opossum, (G) red brocket deer, and (H) coati. Time of day is based on sun time. Sample size of independent records (n) and percent time active at night (%Night) are indicated on the top of each plot frame.

Supplementary Data SD7-2. Circadian activity density of 7 prey species based on all survey sites 2010-2019: (A) white-tailed deer, (B) collared peccary, (C) four-eyed opossum, (D) raccoon, (E) Dice's cottontail, (F) tamandua, and (G) Baird's tapir. Time of day is based on sun time. Sample size of independent records (n) and percent time active at night (%Night) are indicated on the top of each plot frame.
