

Supplementary figures

Overall survival of patients with esophageal cancer who underwent curative surgery between 2011-2016
By number of lymph nodes

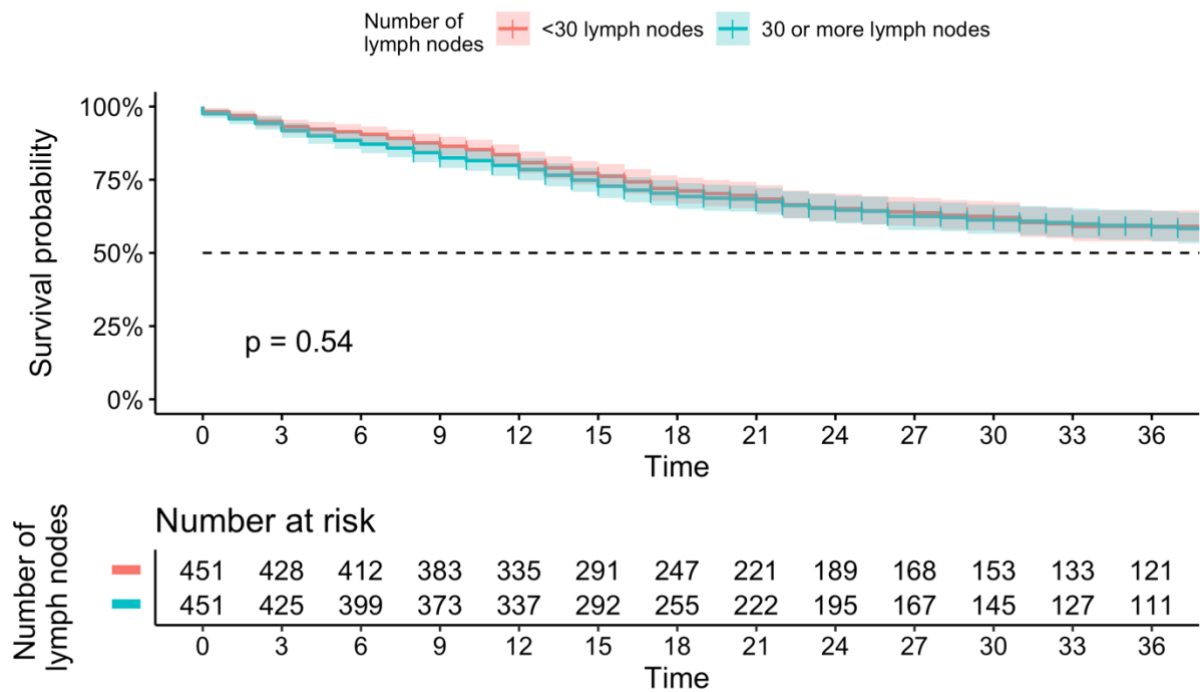

Supplementary figure 1: Overall survival curves with 95% confidence interval of the subgroups ≥ 10 LNs versus < 10 LNs in the propensity matched cohort.

Overall survival of patients with esophageal cancer who underwent curative surgery between 2011-2016
By number of lymph nodes

Supplementary figure 2: Overall survival curves with 95% confidence interval of the subgroups ≥ 20 LNs versus < 20 LNs in the propensity matched cohort.

Overall survival of patients with esophageal cancer who underwent curative surgery between 2011-2016
By number of lymph nodes

Supplementary figure 3: Overall survival curves with 95% confidence interval of the subgroups ≥ 30 LNs versus < 30 LNs in the propensity matched cohort.
