

Figure S1: Percentage of eligible participants excluded because they do not have a coded cancer feature (green) or only have a suspected-cancer code (red) in the year before diagnosis (2006 to 2017), for bladder, breast, colorectal, lung, myeloma, oesophagus, ovary, pancreas, prostate, stomach and uterus. Only participants with a code for a cancer-specific feature (blue bars) were included in the analyses

(a) bladder

(b) breast

(c) colorectal

(d) lung

(e) myeloma

(f) oesophagus

Figure S1: cont.

(g) ovary

(h) pancreas

(i) prostate

(j) stomach

(k) uterus
