APPENDIX 2 – MEDICATIONS WHICH MAY BE ASSOCIATED WITH THE OCCURRENCE OF VASCULITIS

Medications often acting as the source
of vasculitis
Allopurinol
Alpha-methyldopa
NSAIDS
Anti-TNF-alpha
Azathioprine
Beta-Lactam antibiotics
Cimetidine
Clozapine
D-Penicillamine
Hydantoin
Hydralazine
Ketoconazole
Levamisole
Minocycline
Phenothiazine
Propylthiouracil
Quinidine
Quinolones
Gold salts
Sulfonamides
Thiazides

Madiations often involved as the
Medications often implicated as the
source of ANCA-associated vasculitis
Propylthiouracil +++
Hydralazine +++
Allopurinol
Anti-TNF-alpha
Ciprofloxacin
Clozapine
D-Penicillamine
Leukotriene inhibitors
Levamisole
Minocycline
Phenytoin
Sulfasalazine
Thioridazine
