19	pro_bidon1	<p>En-tête de section : <i>INFORMATION AND CONSENT</i></p> <p>You are invited to participate in the PAROLE-Onco research project as a professional. However, before giving your consent to participate in this project, please take the time to carefully read, understand and consider the following information. In addition, we invite you to ask any questions you may have to the researcher in charge of the project or other members assigned to this research project and to ask them to explain any words or information that are not clear.</p> <p>The objective of this research project is to evaluate the impact of integrating patient advisors into cancer care teams. These patient advisors are patients who have already experienced episodes of cancer care and services and who use their experience with other patients who are experiencing a similar episode.</p> <p>Your participation in this project consists of completing a 15-minute online questionnaire about your perception of the introduction of patient advisors, collaborative practices and innovative culture.</p> <p>You will not derive any personal benefit from your participation in this research project. However, the results obtained will contribute to the advancement of practices and scientific knowledge in this field.</p> <p>All information collected will remain confidential within the limits of the law. This information includes your name, your contact information, the name of your institution and the title of your position. You will only be identified by a code number. The code key linking your name to your research file will be kept by the responsible researcher. Research data may be published or discussed scientifically without you being identified. The data collected will be kept for 10 years after the end of the study and then destroyed.</p> <p>Your participation in this research is voluntary. You are therefore free to refuse to participate. You can also stop answering the questionnaire at any time by closing your web browser window. Your answers will then be automatically deleted.</p> <p>If you have any questions or comments about this study, please do not hesitate to contact us by email at <a href="mailto:marie-pascale.pomey@umontreal.ca">marie-pascale.pomey@umontreal.ca</a>. If you have any questions about your rights as a participant in this research project, or if you have any complaints or comments, you can contact the CHUM's local service quality and complaints commissioner at 514 890-8484 or your institution's service quality and complaints commissioner, if different from the CHUM.</p> <p>The CHUM's research ethics committee has approved the project and will ensure that the project is monitored by the participating institutions in Quebec's health and social services network.</p> <p>I have read the above information and understand its content. As such, my participation in this questionnaire is voluntary and I consent to the use of my answers for the purposes of this research project. Completion of this questionnaire will be considered as my consent to participate in the study and to the use of the data collected in this questionnaire for the research purposes described in this form.</p> <p>Finally, please note that for those who complete the questionnaire online, it is possible to decrease or increase the font size by clicking on the + or - in the upper right-hand corner.</p>	checkbox Alignement personnalisé : LV
