PD = Prevalence difference; CI = Confidence interval

Rows and columns may not sum to total because of missing values.

Counts are unweighted; percentages and 95% CIs are survey-weighted.

To ascertain race-ethnicity, respondents were asked, "Are you Spanish, Hispanic, or Latino?" and then, "Please indicate what you consider your race to be. We appreciate your effort to describe your background using these US Census Bureau categories." Response options were White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or other Pacific Islander, and Some other race. Respondents could select all answers that apply. American Indian or Alaska Native, Native Hawaiian or other Pacific Islander, Some other race, and those who selected more than one race were combined by Ipsos into an Other & 2+ races category.
