

- Mrp-like sodium/ proton antiporter complex
- Flagellar motor component
- Sodium/ proton antiporter
- Bicarbonate transporter

Figure S8 Schematic illustration of one of the genomic loci with a Mrp-like sodium/proton antiporter (*mrpA-E*) in “*Ca. N. alkalitolerans*”. Two additional putative MrpA or MrpD subunits display sequence similarity to the complex I subunits NuoL and NuoM, respectively. Genes are drawn to scale.
