

Supplementary Figure 5.

A.

B.

Supplementary Figure 5. Cell counting kit-8 (CCK8) results of S1 and MC38 pretreated with *P. gingivalis* and *F. nucleatum* for 24 h. CRC cells were incubated with *P. gingivalis* 33277 and *F. nucleatum* 25586 at a MOI of 100. Expectedly, the MOI in “0.1 *F. nucleatum* 25586” group is 10. *F. nucleatum* 25586 was purchased from ATCC. * $P < 0.05$.
