

Title: Certification of *Eucalyptus* from Guangxi forestry research institute.

Certification

To whom it may concern:

The two clones of *Eucalyptus*, *E. grandis* × *E. urophylla* GL-9 (marked as "G9") and *E. urophylla* GL-4 (marked as "W4") were propagated and bred by Eucalyptus research department of Guangxi forestry research institute. Guodongqiang, a senior engineer and researcher undertook the formal identification of the *Eucalyptus* clone materials used in this manuscript "Metabolic acclimation supports higher aluminium-induced secretion of citrate and malate in an aluminium-tolerant hybrid clone of *Eucalyptus*" that will be submitted to BMC plant biology. *E. grandis* × *E. urophylla* GL-9 and *E. urophylla* GL-4 has been kept in Guangxi forestry research institute.

Deposition number of two clones as below:

E. grandis × *E. urophylla* GL-9 桂 S-SC-EGU-023-2011

E. urophylla GL-4 桂 S-SC-EU-022-2011

Hereby certified.
