**Sample questions from Pennsylvania State Beekeepers Survey S1** (please note that the exact list of questions may have varied between years, and thus we focused on questions that were consistently used)

Are you a current member of the PA State Beekeepers Association?

How many colonies of honey bees did you have alive in November of 20???

How many of these colonies have survived, as of mid-April 20???

Do you monitor for mites?

Did you use any mite treatments on these colonies?

Have you found small hive beetles in your colonies?

Were any of your colonies used to provide pollination services?

If so, what crops did they primarily pollinate?

GPS coordinates (if known)

How did you replace losses?

When do you have your primary nectar flow?

What is your primary nectar flow of the year?

Are you raising nucs for sale in Pennsylvania in 2019?

How many years experience do you have keeping honey bees?

**Table S2:** Anonymized survey database included with corresponding weather, topographic, landscape and management data (geographic information is missing for privacy concerns). A description of all the variables is included, and it follows Table 1 presented in the main manuscript.
