

S6 Table. ROC curve results based on FAR, MLR, NLR, and PLR of locally advanced or metastatic PC patients in training set

Biomarker	Best cut-off point	AUC (95% CI)	Sensitivity of Youden index	Specificity of Youden index
NLR	2.61	0.558 (0.507-0.609)	0.416	0.721
PLR	170.73	0.548 (0.498-0.598)	0.761	0.341
MLR	0.36	0.569 (0.519-0.619)	0.635	0.504
FAR	0.079	0.641 (0.594-0.689)	0.635	0.656

AUC, the area under the ROC curve; CI, confidence interval; FAR, fibrinogen-to-albumin ratio; MLR, monocyte-to-lymphocyte ratio; NLR, neutrophil-to-lymphocyte ratio; PLR, platelet-to-lymphocyte ratio; ROC, receiver operating characteristic.
