**Figure S2.** Protection history of study sites, 1974 - 2014. White bars = years that sites were open to all fishing, grey bars = years when sites were open to only hook and line fishing, and black bars = years when sites were closed to fishing. Asterisks = years of sampling.

L. lentjan	Hemigymnus fasciatus	C. striatus/strigosus	C. lineolatus	C. cuning		
L. microdon	H. melapterus	C. tominiensis	C. lunula	C. lunaris		
L. obsoletus	Lutjanus biguttatus	Excavators	C. melannotus	C. teres		
L. olivaceus	L. fulviflamma	Cetoscarus bicolor	C. mertensii	Hemitauricthys polylepis		
L. ornatus	Mulloides flavolineatus	Hipposcarus longiceps	C. ocellicaudus	Naso brevirostris		
L. spp	Parupeneus barberinus	Chlorurus bleekeri	C. octofasciatus	N. minor		
Lutjanus argentimaculatus	P. barberinoides	C. bowersi	C. punctatofasciatus	N. thynnoides		
L. bohar	P. bifasciatus/crassilabris	C. gibbus/microrhinos	C. rafflesi	N. vlamingii		
L. decussatus	P. ciliatus	C. sordidus/spilurus	C. semeion	Pterocaesio diagramma		
L. fulvus	P. cyclostomus	Scrapers	C. speculum	P. pisang		
L. gibbus	P. multifasciatus/trilineata	Scarus altipinnis	C. ulietensis	P. randalli		
L. monostigma	P. vanicolensis	S. chameleon	C. unimaculatus	P. tessellata		
L. rivulatus	Plectorhinchus chaetodonoides	S. dimidiatus	C. vagabundus	P. tile		
L. russelli	P. gaterinoides/lineatus	S. forsteni	C. xanthurus	Small planktivores		
Macolor niger		S. frenatus	Forcipiger flavissimus	Abudefduf vaigiensis		
Monotaxis grandoculis	P. lessoni	S ghobban	Gomphosus varius	Amblyglyphidodon aureus		
Piscivores	P. orientalis	S. globiceps	Scolopsis bilineatus	A. curacao		
Anyperodon leucogrammicus	P. picus	S. lunula	S. lineatus	A. leucogaster		

 Table S1. Coral reef fish species within trophic groups.

Aetheloperca rogaa	P. polytaenia	S. niger	Thalassoma hardwickii	Chromis amboinensis
Carangid spp.	P. spp.	S. oviceps	T. lunare	C. retrofasciata
Cephalopholis argus	Croppers	S. prasiognathus	Zanclus cornutus	C. ternatensis
C. boenack	Acanthurus japonicus	S. rivulatus	Obligate corallivores	C. viridis
C. cyanostigma	A. nigrofuscus	S. spinidens	Chaetodon baronessa	C. weberi
C. leopardus	A. nigricans	S. tricolor	C. bennetti	Chrysiptera talboti
C. microprion	Naso annulatus	S. rubroviolaceus	C. ornatissimus	Cirrhilabrus spp.
C. miniatus	N. brachycentron	Sandfeeders	C. trifascialis	Dascyllus aruanus
C. sexmaculatus	N. lituratus	Acanthurs leucocheilus	C. trifasciatus	D. reticulatus
C. spp	N. tuberosus	A. nigricauda	Omnivorous pomacentrids	D. trimaculatus
C. urodeta	N. unicornis	A. olivaceus	Pomacentrus amboinensis	Pomacentrus coelestis
Epinephelus caeruleopunctatus	Siganus argenteus	A. pyroferus	P. brachialis	P. lepidogenys
E. fasciatus	S. canaliculatus	Scarus flavipectoralis	P. moluccensis	Pseudanthias huchtii
E. fuscoguttatus	S. corallinus	S. psittacus		P. squammipinnis
E. malabaricus	S. doliatus	S. quoyi		P. tuka
E. merra	S. guttatus	S. schlegeli		
E. ongus	S. puellus			
E. polyphekadion	S. punctatus			
E. spp	S. punctatissimus			
Plectropomus areolatus	S. spinus			
P. laevis	S. unimaculatus			
P. oligocanthus	S. virgatus			
Variola albimarginata	S. vulpinus			
V. louti	Zebrasoma scopas			
	Z. veliferum			

**Figure S3**. Long-term (1983-2014) temporal trends in biomass of different trophic groups, total fish biomass, and hard coral cover versus years of protection by no-take marine reserve (NTMR) status at Apo Island. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. NTMR site is shown in green and fished site in blue. Note that the y-axis for hard coral is percent cover, not biomass. Note y-axis ranges differ among panels.

**Figure S4**. Long-term (1983-2014) temporal trends in biomass of different trophic groups, total fish biomass, and hard coral cover versus years of protection by no-take marine reserve (NTMR) status at Sumilon Island. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. NTMR site shown in green and fished site in blue. Note that the y-axis for hard coral is percent cover, not biomass. Note y-axis ranges differ among panels.

**Figure S5**. Long-term (1983-2014) temporal trends in mean biomass (± SE) of coral reef trophic groups at four sites. (a) Apo reserve – environmental disturbances (red brackets) from left to right are coral bleaching, local storm and back-to-back typhoons. (b) Apo fished – environmental disturbance (red brackets) is coral bleaching. (c) Sumilon reserve – environmental disturbances (red brackets) from left to right are destructive fishing, and crown-of-thorns and coral bleaching. Arrows indicate when fishing starts, stops or is restricted (= line fishing allowed). (d) Sumilon fished – environmental disturbances (red brackets) from left to right are coral bleaching and typhoon. Arrows indicate when fishing starts, stops or is restricted (= line fishing allowed).

**Figure S6.** Long-term (1983-2014) temporal trends in biomass (left y-axis) of different trophic groups, and hard coral cover (right y-axis) at Apo Reserve. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. Fish biomass is purple and hard coral is brown. Note y-axis ranges differ among panels. Environmental disturbances (red brackets) from left to right are coral bleaching (1998), local storm (2010) and back-to-back typhoons (2011-2012).

**Figure S7**. Long-term (1983-2014) temporal trends in biomass (left y-axis) of different trophic groups, and hard coral cover (right y-axis) at Apo fished site. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. Fish biomass is purple and hard coral is brown. Note y-axis ranges differ among panels. Environmental disturbance (red brackets) is coral bleaching (1998).

**Figure S8.** Long-term (1983-2014) temporal trends in biomass (left y-axis) of different trophic groups, and hard coral cover (right y-axis) at Sumilon Reserve. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. Fish biomass is purple and hard coral is brown. Note y-axis ranges differ among panels. Environmental disturbances (red brackets) from left to right are destructive fishing (1984), and crown-of-thorns and coral bleaching (1998).

**Figure S9**. Long-term (1983-2014) temporal trends in biomass (left y-axis) of different trophic groups, and hard coral cover (right y-axis) at Sumilon fished site. Data points are means, trend lines are sixth order polynomials, and shading represents 95% confidence intervals. Fish biomass is purple and hard coral is brown. Note y-axis ranges differ among panels. Environmental disturbances (red brackets) from left to right are coral bleaching (1998) and typhoon (2012).
